## First Fit

→ Pick the first block that fits

## **Data structure**

free list, sorted LIFO, FIFO, or by address

## Code

scan list, take the first one

## Best Fit vs First Fit

Suppose memory has two free blocks (size 20 and 15)

Workload | :alloc(10), alloc(20)

• Workload 2:alloc(8), alloc(12), alloc(12)
